

## WHITEPAPER

# Reseller Panel

Manage sales, customers and products

Business management sometimes can wear out. That's why there is so many tools on the market whose main goal is to make work more efficient. But as always, some do this better and some do worse.

With this in mind, we have created an intuitive reseller panel, which offers an extremely simple management of your clients and partners accounts and let you spend your time more productive.

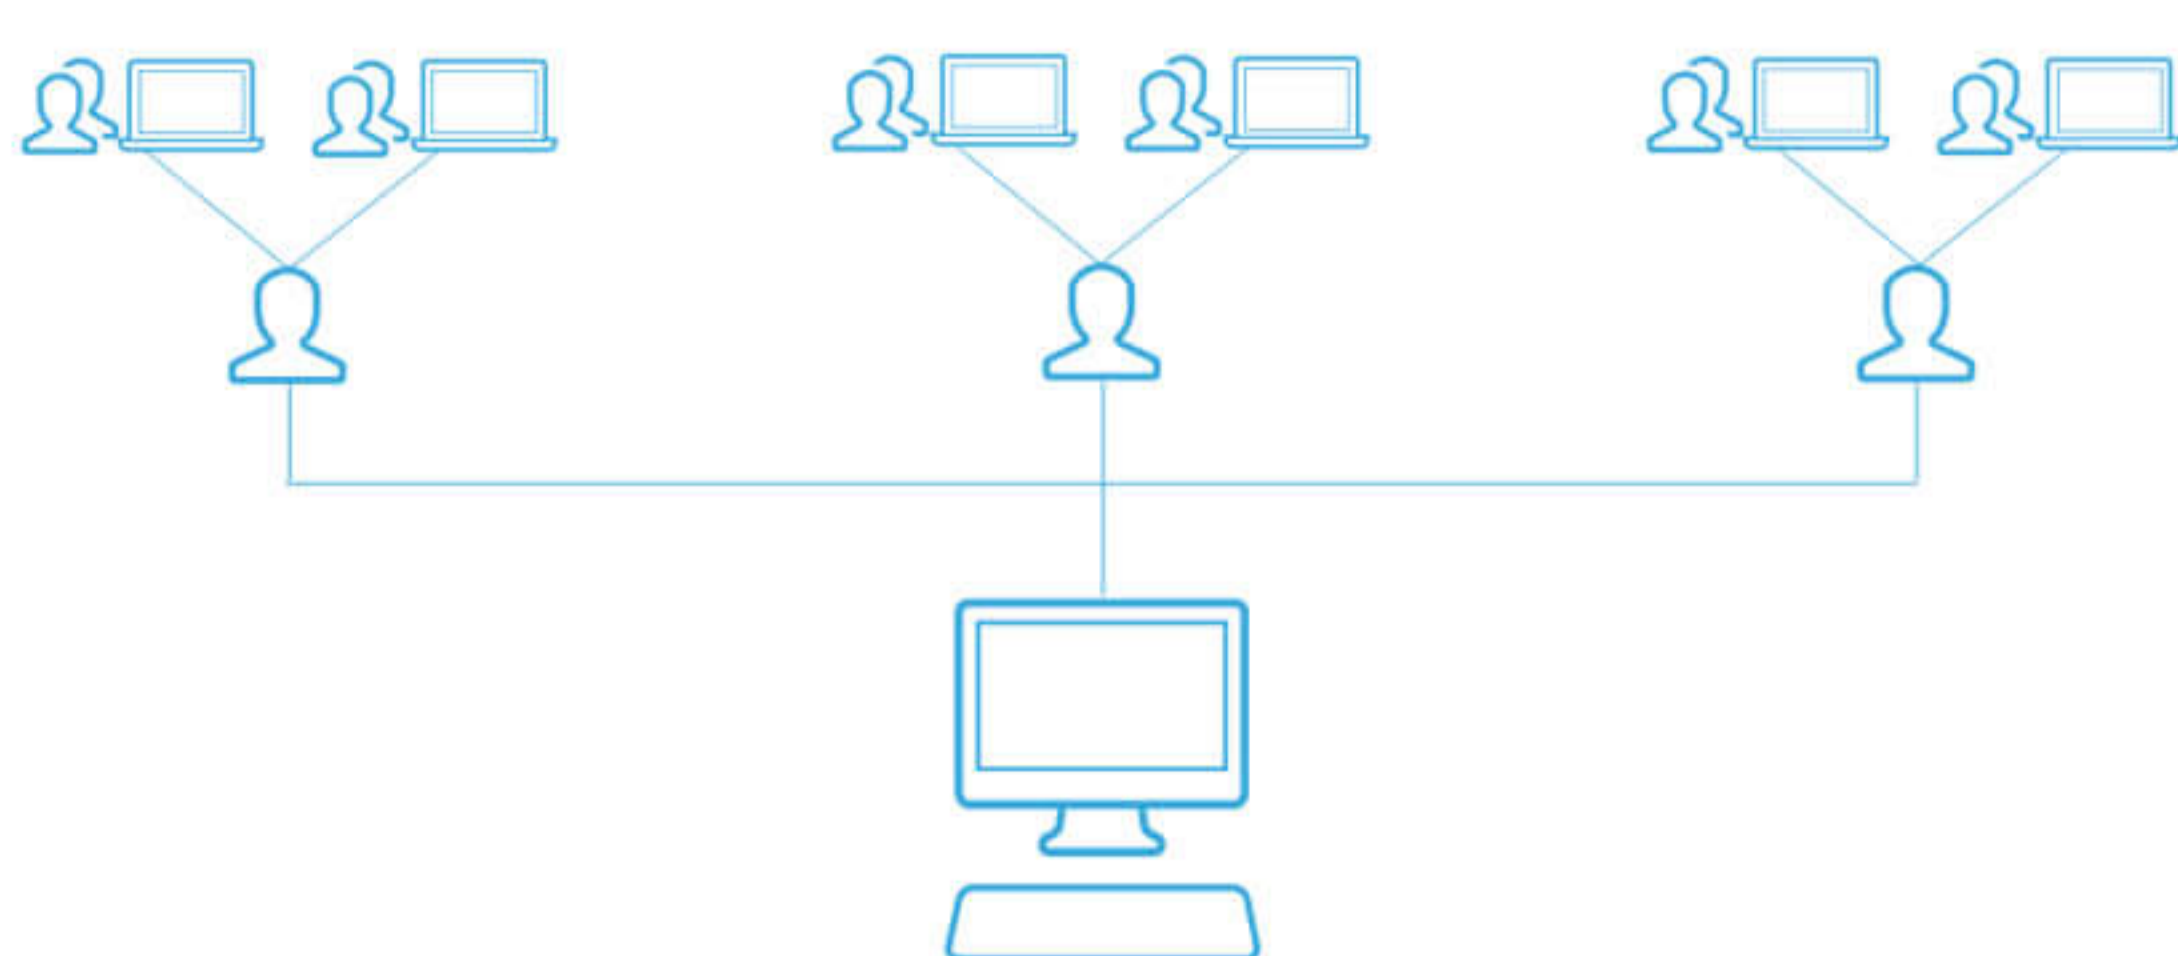

### What will you gain

#### 1 Reall time monitoring

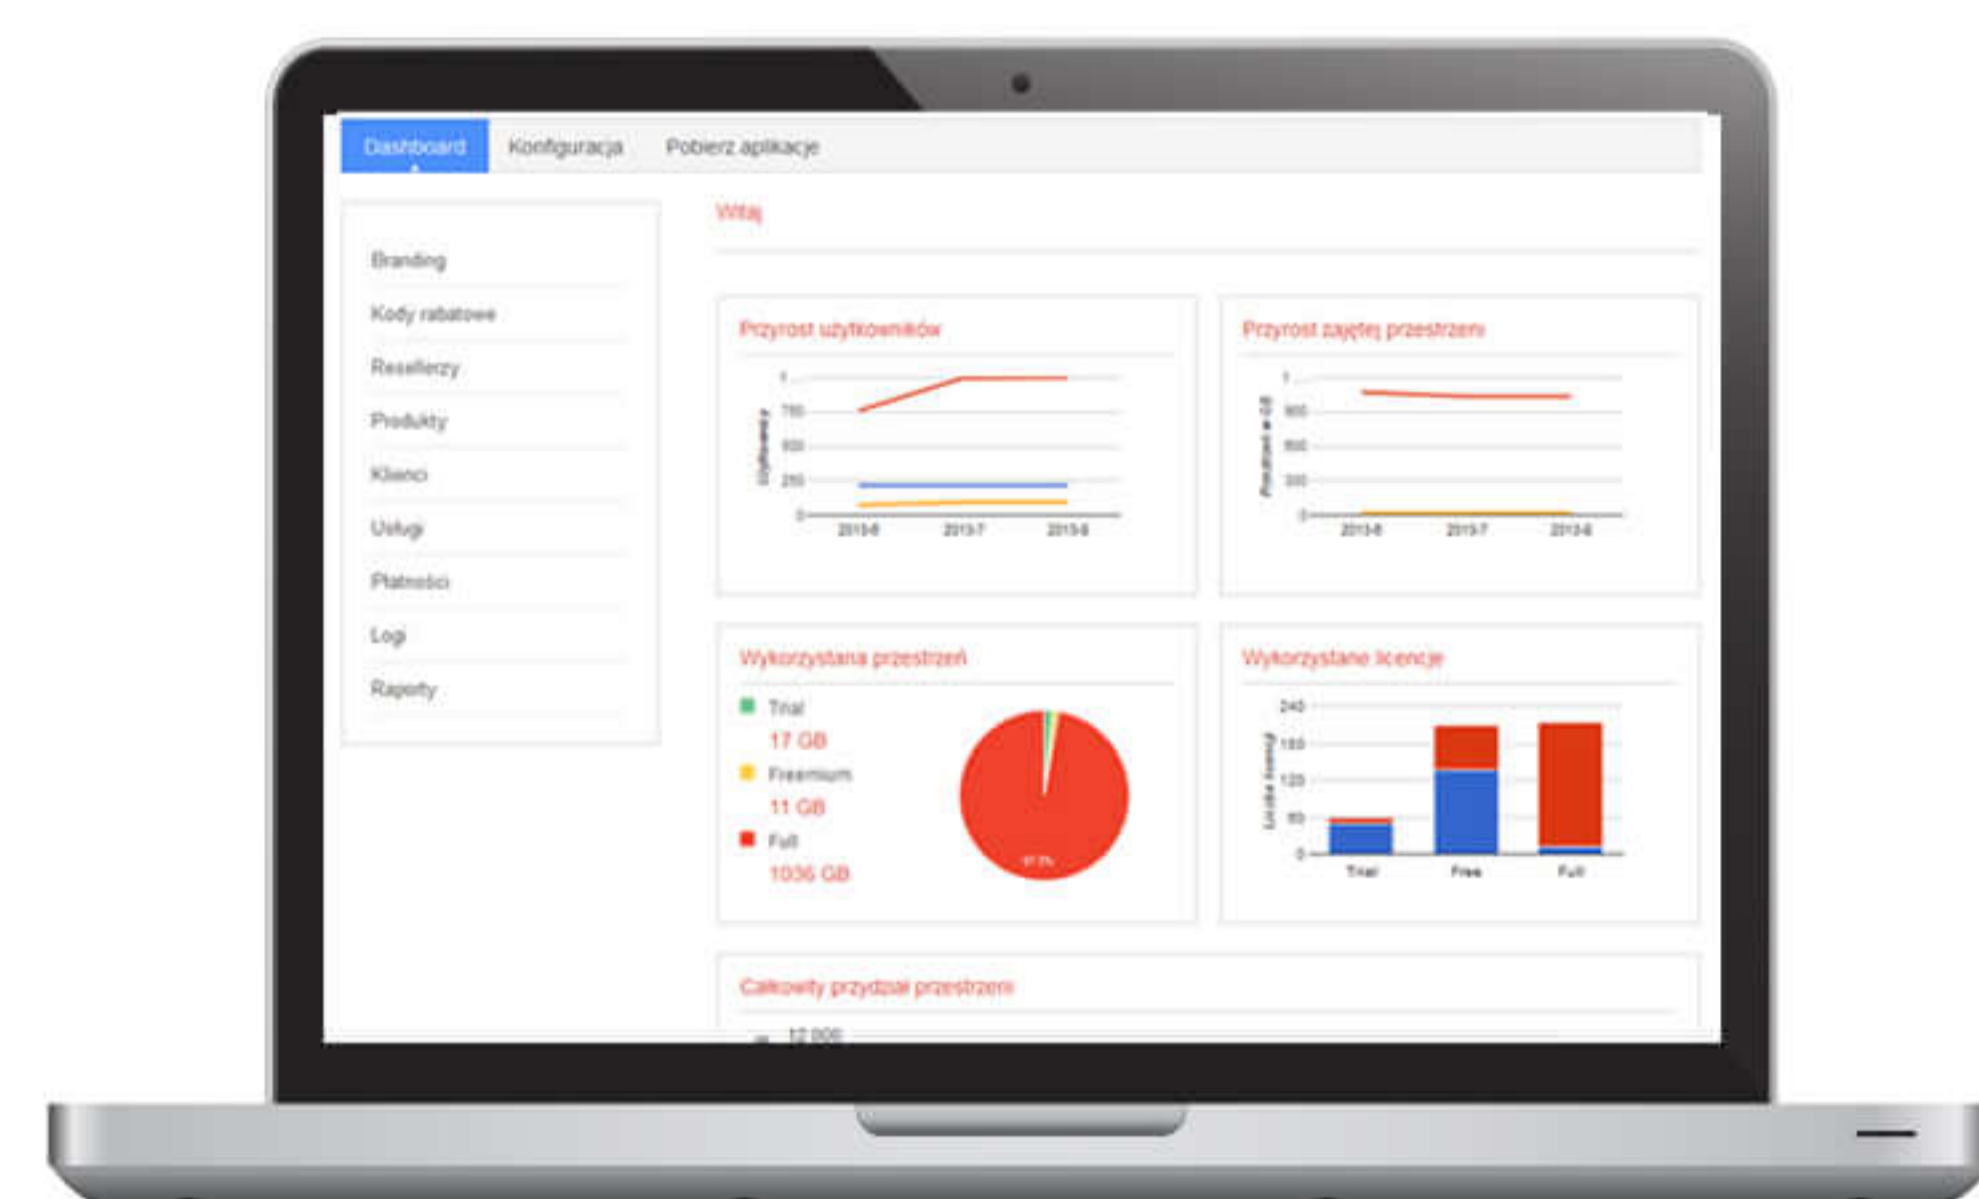

All key information in one place: number of system's users (and how much it increase), occupied space, number of used licenses, the amount of space allocated and many more. Additionally, given in a clear and user-friendly form, so you do not waste time on tedious analysis.

#### 2 Simple management

Comprehensive tool that allows management of customers & resellers accounts and product lists. Adding a new item takes only few minutes. You fill the right form, save changes and all is ready.

Simple management of reseller and end user accounts

Intuitive Reseller Panel simplifies the management of services, resellers & customers accounts

#### 3 Billing system

Developing a billing system is a process that costs even thousands of dollars, but we give you a full package – a total backup solution with a dedicated billing system. So you can start earning money within few minutes

#### 4 Simple integraton

Already using some billing system? That is not a problem, because our product has been integrated with many number of word-awarded solutions including WHMCS and Odinn

#### 5 Branding

You can rebrand and customize all elements of reseller panel, so it's fully aligned with your own company's style and brand identity

#### 6 Marketing automation

Lead effective marketing campaigns and streamline your sales model and communication with customers. Keep an eye on your sales statistics and monitor the effects of promotional campaigns as well
